

IRB Protocol Development Application

(as needed for development of research design, methods, and materials)

Protocol Development Approval is an administrative approval granted by the UWG IRB for protocol development activities. This application was developed to facilitate the submission of grant applications where the Sponsor requires IRB review but researchers do not have immediate plans for the involvement of human subjects, their data, and/or their specimens.

Approval of this application is not an approval to interact with Human Participants. All data collection procedures, recruitment materials, informed consent documents, study instruments, and proof of CITI training must be submitted to the IRB via the regular application procedures before interaction with human participants may begin.

Title of Protocol			
Contact Information			
Name			
Department		Email	
Please list additional team members who may obtain informed consent or collect data from/about human subjects			
Funding Information			
Sponsor			
Specific grant name or #			
Briefly describe the overall objectives of the grant			
Briefly describe the activities that will involve human subjects for which IRB approval will be sought in the future			
Describe study instruments which will be developed if your project is funded			
Approximate date of award/funding announcement			

I certify that the information I provide in this application is correct and complete. The information contained in this protocol Development Application matches the grant indicated above. I understand that this administrative approval indicates preliminary review of the scope and intent of the project but does not indicate full IRB approval. No interaction with human subjects including recruitment will take place until I have completed the UWG IRB review process.
